

About The Program

The goal of our program is to provide an organized environment for students to excel in developing self-confidence, self-initiation, self-discipline, teamwork and creativity in their learning journeys. In order to accomplish this goal, we implement the following: During the homework hour, our tutors provide assistance in homework assignment by answering questions, giving guidance and "point check" students' work.

To augment students learning at school, we provide supplementary workbooks, exercises, audio-visual aids and games in phonics, readings and mathematics. In addition, special workshops and Enrichment courses are to broaden students' horizon, interest and potential. We are currently considering one-on-one tutoring service (extra fee may be required) for academic challenged students.

For students in extended hour, we also include a "twice a week library visit" to build strong readers; and an "outdoor activities hour" at nearby park to build strong bodies. Last but not least, we take pride of our tutors' qualifications; most of our tutors are university students, college graduates, current and retired teachers. The tutor/student ratio is maintained at or below 1:6 in K to 2nd grades and 1:8 in 3rd to 8th grades.

In order to achieve our goals and keep our students' mind focus on the program, no video games and any kind of gadgets are allowed in the Center. Please prepare enough nutritious snacks to keep their energy going for the rest of the day, and we will only provide filtered tap water.
